Eashwara Prasadh R

Full-Stack Developer · AI/ML Engineer · UI/UX Designer

2+ years shipping production SaaS end-to-end — wireframe to cloud. Blends strong engineering, AI integration and design instinct to build products users love.

Based in India · Happy to relocate anywhere in the world

CORE SKILLS & TECHNOLOGIES

Languages	Python · JavaScript (ES6+) · Java · PHP · SQL
Frontend	React.js · HTML5 · CSS3 · Tailwind CSS · Responsive UI · Component Systems
UI / UX	Figma · Wireframing · User Research · Design Systems · Prototype-to-Code
AI / ML	YOLO v11 · Fine-tuning · Training from Scratch · Multi-Agent AI · Computer Vision
Backend	Node.js · Laravel · RESTful APIs · Supabase (PostgreSQL) · MySQL
Cloud	AWS (EC2, S3) · Git & GitHub · Hostinger · cPanel · AI-assisted Workflows

WORK EXPERIENCE

Technosprint Info Solutions · Associate → Senior Developer

Mar 2024 – Present Canada · Remote

- **Promoted to Senior Developer**, managing a 50-member team — coordinating sprints, code reviews and cross-functional delivery.
- **Owned a Laravel & MySQL ticketing platform** end-to-end for 40+ employees handling 400+ tickets/month.
- Shipped **20+ custom web apps** for Canadian and French clients (React, Node.js, Supabase) — from brief to cloud deployment.
- Built **pixel-perfect responsive UIs** in React + Tailwind and cut delivery times by integrating AI-assisted coding workflows.

FEATURED PROJECTS

Smart Agriculture Rover & Pest Detection System ★ Yukti Innovation Challenge 2025 — Final Round · Govt. of India

IoT Computer Vision Python YOLO v11 Raspberry Pi 4 ESP8266

- Engineered a teleoperated rover with Raspberry Pi 4 + YOLO v11, fine-tuned on custom pest datasets for real-time detection in live field conditions.
- Trained and validated custom object detection models on domain-specific agricultural image data — adapted weights for novel pest categories beyond COCO classes.
- Built full telemetry pipeline: ESP8266 sensors → soil moisture & environment data → live React dashboard for agronomist analysis.

Menstrual Intelligence & Wellness Platform ★ 2nd Runner-Up — National Level AI Agentic Hackathon

Multi-Agent AI React Node.js Figma Medical AI UX Research

- Architected a multi-agent AI system from scratch to interpret PCOD medical reports, predict cycle variations and deliver personalised health guidance — placed 2nd nationally.
- Designed complete UX flow and component library in Figma before writing code — ensured sensitive health content communicated with empathy and clarity.
- Built ‘Work Sync’ dashboard dynamically allocating tasks by cognitive energy modelling, fusing behavioural science with real-time AI recommendations.

Eashwara Prasadh R · Full-Stack Developer · AI/ML · UI/UX

AI & MACHINE LEARNING CAPABILITIES

End-to-End ML Pipeline Experience:

- Pre-trained model deployment — integrated YOLO v11 and SOTA models into production with custom real-time inference pipelines.
- Fine-tuning on custom datasets — adapted vision models to domain-specific agricultural & health use-cases via transfer learning.
- Training from scratch — built and trained neural architectures from data curation and augmentation through to full evaluation loops.
- Multi-agent AI design — orchestrated autonomous agents with tool use, memory and inter-agent communication for complex health-tech systems.
- Edge AI & IoT integration — real-time model inference on Raspberry Pi connected to live sensor telemetry streams.

UI / UX DESIGN APPROACH

Design-to-Code Workflow:

- User research & problem framing — mapped user journeys and conducted interviews before writing a single line of code on client projects.
- Wireframing & prototyping — created low and high-fidelity wireframes in Figma for web apps and dashboards, iterating on feedback before dev.
- Component-driven development — built reusable React + Tailwind design systems ensuring visual consistency across 20+ projects at scale.
- Accessibility & responsiveness — all UIs built with mobile-first principles and WCAG-aligned contrast and typography standards.

WHAT I BRING TO A HIGH-GROWTH SAAS TEAM

Full Ownership Mentality
Took end-to-end ownership of a production system used by 40+ employees — no hand-holding needed.

AI-Native Builder
Uses AI tools to ship faster AND builds AI-powered products — multi-agent systems, vision models, real-time inference.

International Client Experience
Delivered 20+ solutions for Canadian and French clients — understands cross-cultural professional standards.

Design + Engineering Combined
Bridges Figma and code — no lost-in-translation between design and dev.

Speed Without Sacrificing Quality
Balancing a full-time remote role + two national hackathon finishes while maintaining academic standing.

Competition-Tested Ideas
Qualified for Govt. of India Yukti 2025 Finals & won 2nd Runner-Up at a National AI Hackathon.

EDUCATION & ACHIEVEMENTS

B.Tech — Computer and Communication Engineering
Sri Manakula Vinayagar Engineering College, Puducherry
2023 – 2027
Expected Graduation: 2027

Class Representative (3+ years) — liaison between 60+ students and faculty; organised technical workshops and academic events.

★ **Yukti Innovation Challenge 2025**
Final Round Qualifier — Govt. of India national innovation challenge for student engineers.

★ **National AI Agentic Hackathon**
2nd Runner-Up — Menstrual Intelligence & Wellness Platform, national level AI competition.
